

ABSOLUTE DATA PROTECTION

ATLASCOMPLETE – A FULLY MANAGED INFRASTRUCTURE OUTSOURCING SOLUTION

Before the e-business revolution, servers and information technology (IT) departments were specialized entities within organizations that were dedicated to individual tasks such as billing or customer-information storage. Almost overnight, processes and departments required integration, and IT departments were thrust into the company spotlight. These IT systems power websites; mission-critical databases; essential accounting, customer relationship and business intelligence software; and tie in to almost every critical business function.

To stay competitive, companies need to maintain a constant dialogue with customers, business partners, employees and other constituents. Consequently, businesses must maintain reliable and accessible IT environments to meet the needs of the changing marketplace. Managing increasingly complex infrastructures, offering more hours of support and 24/7 access to information have become resource drains.

ATLASCOMPLETE is an infrastructure outsourcing solution that provides the experience and technical expertise to support your organization’s IT requirements. Instead of taking over total management responsibility, the ATLASCOMPLETE Solution supplements your IT operations and enables your employees to devote more time to key initiatives. There are numerous benefits to implementing ATLASCOMPLETE, including:

- ATLASCOMPLETE SOLUTION**
- ◆ Fully Managed Outsourcing Solution – 24x7x365
 - ◆ Lower operating costs by leveraging our expertise and experience in systems operations and management
 - ◆ World Class Data Center Facilities
 - ◆ Disaster recovery options to meet client requirements

ATLASCOMPLETE SOLUTION	
Managed Solution	AtlasComplete is fully managed solution that leverages our world class technical staff and data centers to provide 24/7 operations support, allowing your IT Staff to focus on strategic initiatives.
Technical Expertise	AtlasComplete supports all all major vendor hardware (IBM, HP, SUN, Dell) and all major operating system software (AIX, HP/UX, Solaris, Windows, OS/400).
Support	AtlasComplete includes vendor management, network service, application support, database administration, security and training.
Cost Savings	AtlasComplete reduces and controls operating costs by leveraging experience and internal resources.
Regulatory Compliance	The Atlas Digital Data Center is SAS 70 compliant and our solutions exceed the “data safeguards” rules defined by Sarbanes-Oxley, HIPAA, NASD and NYSE.

ATLASCOMPLETE provides our clients a secure physical environment while ensuring the availability of the technical expertise needed to maintain their systems. "Pay as you go" pricing is structured whether our client's business is growing or their dependence on certain systems is decreasing. Atlas Digital Solutions has the expertise, staff and infrastructure to provide the most cost effective options to our clients.
