

ABSOLUTE DATA PROTECTION

ATLASVAULT – A FULLY MANAGED ONLINE REMOTE BACKUP & RECOVERY SOLUTION

Whether human or system failure, virus or catastrophic disaster, data is constantly at risk. Inevitable data loss can range from simple annoyance to financial devastation. Today's organizations need reliable protection solutions that ensure backup discipline while freeing up IT to focus on strategic initiatives. The Atlas Digital Remote Backup and Recovery Solution, ATLASVAULT, delivers trusted disk-to-disk data protection that synchronizes data backup and offsite storage by simply installing software and leveraging existing Internet connectivity.

ATLASVAULT provides absolute data protection through a comprehensive, automated process that is ideal for data lifecycle management and fulfilling contingency rules governed by compliance mandates. With disciplined offsite storage, expert technical support and secure web-based recovery methods, you can focus on core competencies knowing that your organization is fully protected.

From backup to offsite protection to recovery, traditional tape-based backup procedures continue to show protection deficiencies.

 - ◆ Automatic Offsite Protection
 - ◆ Delta Backup Technology
 - ◆ Web-Based Management
 - ◆ Built-in Open File Protection
 - ◆ Flexible Bandwidth Management
 - ◆ SLA-Guaranteed Recovery
 - ◆ Multi-Platform Support

Traditional Problems	ATLASVAULT SOLUTION
Backups or restores experience frequent <i>failures</i> .	AtlasVault eliminates the many points of failure associated with tape-based solutions.
Backups do <i>not</i> occur with daily discipline.	AtlasVault provides a continuous, automatic backup of your data in accordance with customized retention schedule.
Backups do <i>not</i> get offsite with daily discipline.	AtlasVault instantly protects data offsite.
Backups do <i>not</i> get stored in a secure space.	AtlasVault stores data between our highly secure data centers.
Remote offices are <i>not</i> adequately protected.	AtlasVault centralizes management and automatically backs up remote offices with no hardware or added manpower.
Backup window is taking <i>too</i> long.	AtlasVault is fully automated, allowing the IT Staff to focus on strategic initiatives. In addition, ADVault significantly reduces backup times by leveraging delta technology.
Restores are <i>too</i> time consuming.	With AtlasVault, you can recover data faster, more easily, and more reliably from disk than recovering from tape.

ATLASVAULT simplifies and automates the protection of all your company's servers including file, database, application and email servers, while eliminating the risks and burdens associated with tape backup.
